EDUCATION

University of Houston

B.S. in Computer Science, Minors: Mathematics and Business Administration

Houston, Texas

Aug 2022 - Dec 2025

Georgia Institute of Technology

M.S. in Computer Science, Specialization: Artificial Intelligence

Atlanta, Georgia

Aug 2026 - Present

EXPERIENCE

JPMorgan Chase & Co.

Software Engineer

Plano, Texas

Feb 2026 – Present

- Contribute to [Chase.com](https://chase.com) - **Benefits & Travel experiences** serving **60M+ active customers**, delivering UI enhancements and customer-facing functionality across card benefit platforms.
- Developed **CardBase**, a centralized account-management platform that consolidated **1,800+ testing accounts** from **10+ documentation sources**, significantly reducing time spent locating account details, MFA codes, and testing resources across **5+ engineering and QA teams**.
- Built quick-action capabilities for a **React-based catalog application** managing Chase benefit content, streamlining content management workflows, and reducing manual effort for internal users by **30%**.
- Developed frontend experiences for **benefit and loyalty initiatives** while improving platform maintainability through **feature-flag optimization**, **environment management enhancements**, and **Playwright automation** improvements, while maintaining **95%+ test coverage**.

University of Houston- CS Department

Teaching Assistant

Houston, Texas

Jan 2024 – Dec 2025

- Managed grading process optimization for Data Structures & Algorithms by enhancing **Bash automation scripts**.
- Headed weekly interactive lab sessions for **100+ students**, guiding them through applied coding exercises on recursion, trees, graphs, and algorithm analysis to improve assignment performance.

Amazon

Software Development Engineer Intern

Bellevue, Washington

Sept 2025 – Nov 2025

- Automated** change-management workflow by building a **Python FastAPI** backend and developing **two custom MCP servers** (orchestrator and validator) while integrating **four MCPs** total, **reducing MCM creation time** from **2–3 hours to under 15 minutes** and eliminating common validation errors.
- Engineered **one-click installation bash scripts** with automated **prerequisite configuration** and authored a **comprehensive wiki** and **standardized change/ticket templates**, enabling **Amazon Q CLI** to generate and validate records—driving seamless adoption across the Sub-Same Day Delivery team.

JPMorgan Chase & Co.

Software Engineering Intern

Plano, Texas

Jun 2025 – Aug 2025

- Built a **web-based full-stack dashboard** proof of concept (POC) using **React.js** and **JPMorgan's enterprise design system (MDS)**, delivering a **polished user experience** aligned with **internal UX standards**.
- Modernized legacy internal tools to improve **accessibility** and **responsiveness**, reducing navigation time by **~40%** and **enhancing usability** for internal stakeholders.
- Architected and **deployed a Kafka-based task event pipeline** on **AWS** with a **team of 4 interns**, leading **schema design**, **staging table setup**, **DRB approvals**, and **implementing consumers/processors** with **90%+ JUnit test coverage** for reliable microservice data handling.

USAA

Software Engineering Intern

Plano, Texas

May 2024 – Aug 2024

- Enhanced UI for an internal all-employee tool that gives user permissions using **AngularJS**, making it **more interactive and user-friendly**, resulting in a **40% increase** in user satisfaction and ease of information retrieval.
- Spearheaded the migration of an application from **JBoss** to **Spring/Spring Boot**, conducting **unit tests** and **integration tests** with other applications, achieving over **90% code coverage**, and significantly **improving system performance and reliability**.

PROJECTS

Syntora (AI-Powered Visual Creation Studio - syntora.app)

Apr 2025

- Designed and created the **entire frontend** of an **AI-driven image creation platform** using **Next.js**, **React**, **Tailwind CSS**, and **Framer Motion**, implementing **responsive, accessible UI across all pages**, including **prompt crafting** and **image library**.
- Integrated **OpenAI APIs** for **image generation**, **prompt analysis**, and **crafting**; implemented **Supabase Auth**, storage, and database, and connected **Stripe** for paid plans — delivering a **fully functional, scalable app** with a **polished user experience**.

SKILLS

Languages: JavaScript, TypeScript, Python, Java, C++, Swift, HTML/CSS

Frameworks & Tools: React.js, Next.js, Spring Boot, FastAPI, SwiftUI, Angular, Playwright, Kafka, Docker, Git

Cloud & Databases: AWS, Azure, SQL, Supabase, Firebase
